Update from [Sammamish Plateau Water](#):

In August, field crews will be conducting sanitary sewer smoke testing in selected areas of the District located within the North Sewer Service Area. Pushing non-toxic "smoke" into the sewer pipes is helpful in detecting connection points where outside surface water can enter into the sewer pipes. During

the testing, you may see this "smoke" coming from vent stacks on buildings or from holes in the ground. Don't be alarmed. This simulated "smoke" is safe and non-toxic, has no odor, is non-staining, does not create a fire hazard, and should dissipate quickly. *To learn more, please click on the image!*

[Sammamish Plateau Water](#) has extended the moratorium on new sewer connections until August 23, 2021 in key areas with limited sewer capacity. Please click on the image to read more.
