

Town Center Open Space Strategy

The Town Center's dominant, identity-giving characteristic will be its constellation of parks, open spaces, natural areas, gathering places, gardens, and trails.

The park, trail, and open space system will not only provide recreational opportunities for city residents, it will also play an important ecological role, serve as an excellent setting for public facilities, provide gathering places, enhance the Town Center's livability, and connect and unify the center with the rest of the city.
