

City of Sammamish, Attn: Kathryn Hoffmann, 801 228th Ave SE Sammamish, WA 98075-9509, is seeking coverage under the Washington State Department of Ecology's Construction Stormwater NPDES and State Waste Discharge General Permit.

The George Davis Creek Fish Passage and Stormwater Improvement Project is located at 635 East Lake Sammamish Shore Lane NE in Sammamish in King County.

This project involves 1.0 acre of soil disturbance to construct storm drain improvements and restore portions of George Davis Creek.

The receiving water is Lake Sammamish.

Any persons desiring to present their views to the Washington State Department of Ecology regarding this Application, or interested in Ecology's action on this Application, may notify Ecology, in writing, no later than 30 days of the last date of publication of this notice. Ecology reviews public comments and considers whether discharges from this project would cause a measurable change in receiving water quality, and, if so, whether the project is necessary and in the overriding public interest according to Tier II anti-degradation requirements under WAC 173-201A-320.
