SMC 21.03.060.G

Tree Retention Compliance

The purpose of the tree retention compliance document is to allow an applicant to show how they meet the City's tree retention code (Chapter 21.03.60 of the Sammamish Municipal Code). The summary should include the number of trees located both within and outside critical area and/or buffer areas, how many trees must be retained pursuant to SMC 21.03.060 and the preliminary plat or short plat approval process, and how many trees were ultimately retained. If more trees were removed than is permitted under SMC 21.03.060 or approved through the preliminary plat or short plat process, please provide an explanation. This summary should be signed by the project landscape architect or licensed arborist.
