SDT2025-00194 PINE LAKE CREEK BASIN PLAN

Date of Issuance: April 30, 2025

Project Description: The City of Sammamish Storm and Surface Water Comprehensive Plan, (“Comp Plan”) October 2016, recommends basin planning as a component to support the management of the City’s surface and stormwater system to benefit the community and meet the City’s overriding goal of health and sustainability. The Pine Lake Creek Basin Plan advances these goals through the following measures: Assessing and documenting watershed conditions. Identifying problems and opportunities related to maintenance, operations, preservation and restoration of natural resources. Developing integrated strategies for surface and stormwater management within the basin. This plan compiles the research and evaluation responding to the above actions and summarizes conclusions and results. The report identifies and prioritizes potential surface water capital projects. It also advances conceptual programs responsive to both the current and the long-term needs of the watershed. Collectively, this effort provides tools that support protection and/or restoration of the City’s natural resources.

Applicant/Proponent: Toby Coenen, Senior Engineer - Stormwater

Project Location: Pine Lake Creek basin located in the southwest part of Sammamish in the East Lake Sammamish Basin, Watershed Resources Inventory Area (WRIA) 8

Lead Agency: City of Sammamish, Department of Community Development

Online Documents: <https://spaces.hightail.com/space/TP0wgQFKWs>

The lead agency for this proposal has determined that it does not have a probably significant adverse impact on the environment, in that the Pine Lake Creek Basin Plan itself does not authorize projects to move forward, nor does it provide funding for any projects on the list. Funding occurs for individual projects and programs that are approved and funded through the City’s biennial budget process. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030(2)(c). This decision was made after review of the completed environmental checklist on file with the lead agency. This information is available at the website listed above, as well as upon request.

The DNS is issued in accordance with WAC 197-11-340(2). The lead agency will not act on this proposal for 14 days from the date listed below. Comments must be submitted in writing and received by the deadline described below. Pursuant to [SMC 21.09.030.L.1.d](#), there is no administrative appeal process for this action.
